Exam rules

+ Exam Rules

In order to pass the exam, both the design and the technology project must be sufficient; in addition, each student must pass a *very short (20 min) writtent exam that will take place on the appello dates*

The project topic and specs assigned during the course remain the same till July. **The topic will be changed for the exam sessions in September and February**

The design project accounts for 40% of the global project score (0-30)

The technology score accounts for 60% of the global project score (0-30)

The written exam is scored [not passed; passed:0; passed: +1, which is summed to the global project score)

+ Exam Rules: project

- The score achieved on the DESIGN project DURING the course (in itinere) **will hold till the end of July**. After that date **all scores** (design project and written exam) expire and it is mandatory to re-do the entire project and the written exam

- The **entire** project or a **part** of it **cannot be resubmitted on the same topic within the same session:** the student/group must resubmit the entire project on a **new** assigned topic in any following exam session

- *Exception: only the design projects delivered in ITINERE and **scored B- or below** are allowed to be resubmitted together with the techno project in JULY*

+ Exam Rules: Written exam

- If a member of the project group does **not** pass the written test he/she will be allowed to re-do the written test **ONLY ONCE**

- If the resul is insufficient also the second time, the student's project evaluations **will expire** and he/she **must submit a project on a different assigned topic**

+
Timing

- The 2 parts of the project must be delivered no later that the date and time of the official appello date;

- **The written exam must be done on the same appello date of project delivery;** in other words, if a group X want to deliver the project for the appello date D, all group members must do the written exam on date D

- Exception: if a group has been evaluated in itinere for the design project, and the design project does not need to be re-evaluated, only the techno project will be delivered by the date and time of an appello in July; the written exam must be done **on the same appello date**.

+
Delivery instructions

The 2 parts of the project must be delivered FOLLOWING INSTRUCTIONS AND FILE NAMING CONVENTIONS DESCRIBED IN THE DESIGN AND TECHNOLOGY PROJECT SPECIFICATIONS (see files in Beep)

- The design project material must be delivered on Beep in the folder «DESIGN PROJECT-date» created for each appello. Only if the size of the material is too large for Beep, you are allowed to post a document (using the same naming convention) containing group members and the link to a different online repository where we can download the material.

- A separate folder will be created for the design projects evaluated **in itinere** that are resubmitted in July for re-evaluation (possible only for design project *scored B- or below) – see previous slides.*

- The technology project must be submitted using the online form

http://goo.gl/forms/rR8nK39fBWfgCK2d2

as described in the techno project specification – **revised version**.

- The material that does not follow the naming conventions will NOT be evaluated.
